Introduction

Our 1st Robot stops the opponent from scoring goals

Our 2nd and 3rd Robots are mainly programmed to score goals

Robots Communication

Our 2nd and 3rd Robots send ball and position data to the 1st Robot

Our 1st Robot calculates the ball position and sends it to other Robots

Ball Positioning Algorithm

If there are 2 data available, a system of equations is solved

If there is only 1 data available, ball position is estimated

If there is no data at all its position is predicted based on previous data

Thank you!
